

Better Data, Better Billing

Avad uses machine learning to help improve the efficiency and effectiveness of anesthesiology and surgery billing. By leveraging our expertise in EHR data and our proprietary machine learning technology, we outperform classic management systems as well as other auto-coding vendors.

Performance:

Avad has a level of EHR integration far beyond other coding vendors.

Avad

99.6%

Accuracy

 **42%**

Coder productivity

The result? Our initial client now codes 42% more cases per hour.

Largest vendor

<unpublished>

Accuracy

 **20-30%**

Coder productivity

Customer Experience:

51% Auto-coded

Over half of our first client's case load is auto-coded at higher than human levels of accuracy, creating more time to focus on QA, compliance, and payor follow-ups to maximize revenue. Coding backlog is eliminated and overtime expenses can be substantially reduced or eliminated.

Full Solution

At Avad, we know that your coding staff do a lot more than just select appropriate CPTs. We support the entire scope of their practice without adding additional cost. We feel that it is our responsibility to spend as much one-on-one time with your coders as necessary to maximize coder satisfaction and productivity.

Full Service Coding:

- Primary CPT
- Supplemental CPTs
- ICD 10 Dx's
- Modifiers

Beyond Codes:

- Data Entry Eliminated
- Staff Concurrency Checks
- PDF Archiving
- BI Reporting

Next Steps

Get in touch. We will demonstrate the numbers above and address HIPAA, SOC II and all the other standard questions as they come up. We work with your existing billing software, EHR, and processes. No need to re-invent the wheel in order to get the benefits.

~ I'm happy to answer any questions or talk next steps personally
